Bo Shang, Ph.D.

Postdoctoral Associate, University of Maryland

Civil and Environmental Engineering / Maryland Transportation Institute

New York, NY

bshang@umd.edu | +1 (929) 520-0488 | Website | Google Scholar | ORCID

Robotics and AI researcher focused on reliable multimodal perception and field robotics for transportation and infrastructure. Research connects sensor integration and field data collection with computer vision, embedded control, cross-site model evaluation, and human review of engineering evidence.

Research Interests

Physical AI and field robotics; LiDAR-camera perception; vulnerable-road-user sensing and transportation safety; robotic infrastructure inspection; UAVs, visual servoing, and GPS-denied navigation; reproducible evaluation across sensors, sites, and operating conditions.

Academic and Research Appointments

University of Maryland | Jul 2026 - Present

Postdoctoral Associate, Civil and Environmental Engineering / Maryland Transportation Institute | College Park, MD

- Support hardware and software development, integration, and testing for two sponsored transportation research projects under Dr. Terry Yang.
- Conduct system troubleshooting, support field data collection, and prepare technical documentation and project deliverables.

The City College of New York, CUNY | Jul 2025 - Jun 2026

Postdoctoral Scholar, AI & Mobility Research Lab | New York, NY

- Developed roadside LiDAR and camera workflows for traffic monitoring, multimodal perception, and transportation safety research.

The City College of New York, CUNY | Jan 2025 - Jun 2025

Graduate Research Assistant, Civil Engineering | New York, NY

The City College of New York, CUNY | Dec 2022 - Dec 2024

Postdoctoral Researcher, Robotics Lab | New York, NY

- Developed robotic inspection software, structural-defect analysis, and engineering review workflows connecting sensors, robots, and cloud services.

Vaughn College of Aeronautics and Technology | Jun 2024 - Aug 2024

Instructor, Computer Engineering Summer Academy (AI module) | New York, NY

Vaughn College of Aeronautics and Technology | Jan 2024 - May 2024

Adjunct Faculty | New York, NY

The City College of New York, CUNY | Aug 2023 - Dec 2023

Adjunct Assistant Professor | New York, NY

Missouri University of Science and Technology | Jan 2020 - Nov 2022

Postdoctoral Fellow | Rolla, MO

- Developed UAV guidance and robotic deployment components for bridge inspection and contributed to multimodal infrastructure sensing research.

University of California, Merced | Jan 2016 - Aug 2017

Lecturer | Merced, CA

- Supported teaching in mechatronics, engineering computing, and unmanned aerial systems; developed initial laboratories for the UAS course.

University profile

University of California, Merced | Aug 2015 - Sep 2017
Junior Specialist | Merced, CA

Education

Northeastern University, China | 2013 - 2020
Ph.D., Pattern Recognition and Intelligent Systems

University of California, Merced, USA | 2015 - 2017
Exchange doctoral research

Northeastern University, China | 2011 - 2013
M.Eng., Pattern Recognition and Intelligent Systems

Northeastern University, China | 2007 - 2011
B.Eng., Automation

Research and Engineering Projects

Roadside LiDAR and camera perception, CUNY | Nov 2024 - Jun 2026

- Developed a workflow spanning sensor capture, temporal synchronization, spatial calibration, background subtraction, object segmentation, and road-user detection.
- Built multi-frame vehicle reconstruction, labeling and quality-assurance workflows, and model evaluation across sites with different beam counts, frame rates, and mounting geometries.
- Separated site-specific configuration from reusable processing and investigated cross-configuration generalization for traffic monitoring and vulnerable-road-user safety.

Robotic inspection automation and structural-defect analytics, CCNY | Dec 2022 - Dec 2024

- Developed CNN-based analysis of cracks, spalling, and stains, with AWS inference and a WebODM-based workflow for 3D reconstruction, localization, visualization, and measurement.
- Built an iOS application for controlling a climbing inspection robot and integrated human review into inspection-data workflows.

Bridge Inspection Robot Deployment System (BIRDS), Missouri S&T | 2020 - 2022

- Developed UAV and clamping-robot components for bridge inspection, including vision-based girder detection, embedded perception, and control of the deployment mechanism.
- Integrated NVIDIA Jetson, Raspberry Pi, ROS, embedded Linux, cameras, and robot communication; tested autonomous guidance, clamping, and traversal workflows.

UAV visible, infrared, and hyperspectral sensing | 2020 - 2022
Developed Python and Ubuntu workflows for multimodal infrastructure inspection, sensing, and flight-path planning.

Robot-assisted underwater acoustic imaging for bridge scour evaluation | 2020 - 2021
Contributed Python/C++, ROS, Arduino, embedded control, and computer-vision components to underwater inspection research.

Vision-based UAV servoing and fractional-order control | 2015 - 2019
Developed and evaluated visual guidance and control methods using cameras, embedded Linux, Raspberry Pi, and fractional-order controllers.

SmartCaveDrone and GPS-denied exploration | 2015 - 2017
Contributed RGB-D mapping, visual SLAM, and sense-and-avoid capabilities for UAV exploration and robotic archaeology.

Early robotics projects | 2010 - 2014

- 2013-2014: AR.Drone and ROS quadrotor object tracking.
- 2012-2013: Indoor LiDAR-equipped quadrotor; 2012: camera-equipped quadrotor.
- 2011: Camera-equipped fixed-wing UAV; 2010: infrared line-following smart car.

Independent Research Software and Educational Platforms

ScholarMind AI / Merit Point Academy | 2026 - Present

Independent AI product development

- Developed a bilingual AI education and research platform with a research assistant, course delivery, robotics evidence pages, and knowledge-graph learning tools.
- Directed AI-assisted software development through requirements, implementation, testing, privacy and attribution checks, and deployment.

Reproducible AI evaluation | 2026

Built evaluation workflows using versioned configurations, replay, failure analysis, and regression checks for research software and tool-using AI agents.

Teaching and Mentoring

University of California, Merced | 2016 - 2017

Teaching support for ME 190 Mechatronics, ME 143 Unmanned Aircraft Systems, and ME 021 Engineering Computing (Fortran and MATLAB); initial laboratory development for the UAS course.

The City College of New York, CUNY | 2023

ENGR 204 Electric Circuits, as Adjunct Assistant Professor.

Vaughn College of Aeronautics and Technology | 2024

MCE 355 Robotics, Mechanics and Control; SBC 012 Principles of AI; SBC 014A Principles of Research-AI. Developed and taught a five-lecture, five-lab AI module for the Computer Engineering Summer Academy.

Research mentoring and robotics outreach

Tutored high-school research assistants at CCNY (2023-2024), coached FIRST Robotics Competition participants (2022), and judged VEX Robotics Competition events for middle-school, high-school, and college students (2024).

Professional Service

Journal reviewer

Nonlinear Dynamics; Journal of Intelligent & Robotic Systems; ISA Transactions; IEEE Transactions on Control Systems Technology; Intelligent Buildings International; International Journal of Advanced Robotic Systems; Control Engineering Practice; IET Control Theory and Applications; Mechatronics.

Conference reviewer

International Conference on Unmanned Aircraft Systems (ICUAS); IEEE International Conference on Robotics and Automation (ICRA); IEEE International Conference on Multisensor Fusion and Integration for Intelligent Systems (MFI).

Session Chair | 2016

International Conference on Unmanned Aircraft Systems (ICUAS).

Review record

Web of Science profile

Honors, Support, and Credentials

Teaching Certificate, Association of College and University Educators (ACUE) | 2021

FAA Remote Pilot Certificate for Small Unmanned Aircraft Systems | 2016

China Scholarship Council (CSC) doctoral exchange support | 2015 - 2017

Two-year exchange program at the University of California, Merced; US$38,400 in financial support.

International Aerial Robotics Competition | 2014

Best System Control Award and Best Mission Planning Award, as team leader.

International Mathematical Contest in Modeling | 2010

Meritorious Prize, as programmer.

National Smart Car Competition, Freescale, China | 2010

First Prize, Northeastern Region.

Technical Expertise

Robotics and sensing

ROS / ROS 2, NVIDIA Jetson, Raspberry Pi, Arduino, embedded Linux; LiDAR, RGB/RGB-D, thermal, IMU, and acoustic sensing; sensor bring-up, synchronization, calibration, and field troubleshooting.

Software and machine learning

Python, C++, PyTorch, TensorFlow, OpenCV, Linux, Docker, Git/GitHub Actions, AWS; computer vision, 3D reconstruction, visual SLAM, model packaging, and data pipelines.

Evaluation and research delivery

Dataset and configuration versioning, labeling and data quality assurance, cross-site evaluation, replay and failure analysis, human review, GIS and traffic analytics, and technical documentation.
